

# Litigation and Support Services

## Consider This

When Intrust Global eServices (IGeS) works on a major case, with its team, its clients are likely to be sleeping soundly thousands of miles away in America.

Work assigned late in the evening would be completed and turned around at your desktop when you return in the morning the next day.

Off shoring would not only free corporate counsel to focus on core high-end strategic tasks, It would ensure that they streamline their operations and cut costs to maintain profitability.

## Key Benefits

**Costs** – Using an Offshore team of Professional lawyers you would be able to reduce your costs by 30%-50% or even more.

**Quality & security** – Work will be performed by fully trained lawyers with adequate controls. We are an IS 27001, ISO 9001 and 14001 & HIPPA compliant organization.

**Time** – You will be able to marshal your resources on strategic high end work.

**Language**- English is the primary language for most Court proceedings in India.

**Similarity of Legal system between India and USA** - Indian lawyers have a good understanding of common law issues. Most of the lawyers on our team have had their education/training in the US.

**Expert Resources** - Providing expertise in virtually all areas of law, thereby allowing IGeS to bring value to all aspects of a corporation's legal department
