

## **CASE STUDY - LITIGATION SERVICES**

### ***CLIENT'S CHALLENGE:***

Client is a leading US based Law firm. Client wanted to have an updated data bank of the leading citations dealing with the issue of master – agent relationship in the context of (Subsidiary and parent company) and master's liability arising out of the said relationship. At the same time client also wanted to know that whether some citations earlier relied by them in one of the previous cases are still relevant or not ? Client is not only concerned with speed and results, but also requires assurance of its information and data security. Thus the Client needed review of the citations in a compressed timeframe but at a reasonable cost and without compromising quality at all.

### ***THE INTRUST SOLUTION:***

- Intrust rapidly assembled a team experienced in research and litigation to conduct preliminary research and assist Client over the course of the litigation.
- Intrust experts in litigation search used Shepard's citation search software of Lexisnexis and started a detailed search on the given complex issue.
- Intrust conducted complex case law & statutory research of the issue and provided the required analysis within a very short span of time.
- Intrust team worked round the clock in multiple shifts and successfully performed a detailed search based on specifications given by client within as short as 25 hours.
- Intrust worked closely with the Client to deploy its methodologies and security systems to ensure the highest quality and the client's data security.
- The team and its project managers interacted frequently with client to be appraised of latest developments in the citation search and timely incorporated almost all the suggestions made by the client.
- Intrust's solution was of exceptionally high quality and extremely cost-effective.
- Final work product was of very high quality and allowed Client to use such information in their pending litigations.

### ***THE INTRUST ADVANTAGE:***

- Access to a trained team for future engagements.
